Preface

This volume constitutes the proceedings of the eleventh European Conference on Object-Oriented Programming, ECOOP '97, held in Jyumylä, Finland, June 9 - 13, 1997. Since the first ECOOP conference in 1987, object-oriented technology has grown from a limited academic exercise to an industrial driving force. Currently, numerous commercial object-oriented software products are available for practical use.

Undoubtedly, object-oriented technology has stimulated the increasing awareness of software practitioners that the software development process is an engineering activity, and just like other engineering disciplines, there are some rules to obey if their goal is to create cost-effective products. For example, the concept of "real-world" modeling enhanced the consciousness that the main goal is problem solving, rather than programming. Similarly, object-oriented technology has helped many academic people in recognizing that the purpose is not only defining correct programs, but also adaptable, reusable, and cost-effective software products. More importantly, object-oriented technology has given to all of us, theoreticians and practitioners, the courage to state that software development can be based on theoretical principles and yet be applied in practical projects. The ECOOP '97 conference with its well-balanced technical program and other exciting activities is a "living proof" of this pleasant evolution.

The ECOOP '97 technical program consisted of 20 papers (selected from 103 submissions), three invited speakers, plus one panel. The program committee, consisting of 26 distinguished researchers in object-orientation, met at the University of Twente in The Netherlands during January 30 - 31 for the paper selection. All papers were reviewed by at least four members of the program committee. The topics of the accepted papers cover traditional ECOOP topics such as programming languages, types, implementation, and formal specifications, as well as some new topics such as design patterns, metaprogramming, and Java.

As for the invited speakers, we were very honored to be able to present the talks by Kristen Nygaard, the well-known pioneer of object-oriented programming languages with his work on Simula-67 which was born 30 years ago in Scandinavia; Gregor Kiczales, who is proposing a new direction in object-oriented research, called Aspect-Oriented Programming; and Erich Gamma, a European pioneer on patterns.

We would like to express our deepest appreciation to the authors of submitted papers, the program committee members, the external referees, Richard van de Stadt for organizing the review process, and many others who contributed towards the establishment of the ECOOP '97 technical program.

April 1997

Mehmet Akşit and Satoshi Matsuoka
ECOOP '97 Program Chairs
Organization

ECOOP '97 was organized by the University of Jyväskylä, under the auspices of AITO (Association Internationale pour les Technologies Objets), and in cooperation with ACM SIGPLAN (Association for Computing Machinery, Special Interest Group for Programming Languages).

Executive Committee

Conference Chair: Boris Magnusson, University of Aarhus, DK
Program Chairs: Mehmet Akşit (University of Twente, NL)
                  Satoshi Matsuoka (Tokyo Institute of Technology, J)
Organizing Chair: Markku Sakkinen (University of Jyväskylä, FIN)
Tutorials:       Erkki Lehtinen (University of Jyväskylä, FIN)
Workshops:       Antero Taivalsaari (Nokia Research Center, FIN)
Management, Exhibition: Taru-Maija Heilala-Rasimov (Jyväskylä Congress, FIN)
Panels:           Jari Veijalainen (University of Jyväskylä, FIN)
Posters:          Pentti Marttiin (University of Jyväskylä, FIN)
Demonstrations:  Risto Pohjonen (University of Jyväskylä, FIN)
Other members:    Matti Rossi (University of Jyväskylä, FIN)
                  Jonne Itkonen (University of Jyväskylä, FIN)

Sponsoring Institutions and Companies

Academy of Finland
University of Jyväskylä
City of Jyväskylä
Nokia Research Center
Finnair
Jyväskylä Science Park Ltd.
Program Committee

Pierre America (Philips Research Laboratories, NL)
Elisa Bertino (University of Milan, I)
Toby Bloom (CMG Direct Interactive, USA, OOPSLA’97 Program Chair)
Frank Buschmann (Siemens, D)
Luca Cardelli (Digital SRC, USA)
Denis Caromel University of Nice - INRIA Sophia Antipolis, F)
Pierre Cointe (Ecole des Mines de Nantes, F)
Derek Coleman (King’s College London, UK)
Theo D’Hondt (Brussels Free University, B)
Peter Dickman (University of Glasgow, UK)
Bjorn Freeman-Benson (Object Technology International Inc., CND)
Rachid Guerraoui (EPFL IN-Ecublens, CH)
Dieter Hammer (Eindhoven University of Technology, NL)
Urs Hölzle (University of California, Santa Barbara, USA)
Shinichi Honiden (Toshiba, J)
Mehdi Jazayeri (Vienna University of Technology, A)
Eric Jul (University of Copenhagen, DK)
Gerti Kappel (Johannes Kepler University, A)
Jørgen Lindskov Knudsen (Aarhus University, DK)
John Lamping (Xerox Palo Alto Research Center, USA)
Karl Lieberherr (Northeastern University, USA)
José Meseguer (SRI International, USA)
Oscar Nierstrasz (University of Bern, CH)
Atsushi Ohori (Kyoto University, J)
Jens Palsberg (Purdue University, USA)
Douglas Schmidt (Washington University, USA)
Referees

Ad Aerts
Davide Ancona
Mikio Aoyama
Jean-Paul Bahsoun
Remi Bastide
Francoise Baude
Claude Betourne
Lex Bijlsma
Mireille Blay-Fomarino
Barbara Catania
Michael Christensen
Henrik Baarbak Christensen
Juan Carlos Cruz
Kris De Volder
Wolfgang De Meuter

Contents

Invited Talk 1

GOODS to Appear on the Stage ................................................................. 1
Kristen Nygaard (University of Oslo)

Programming Languages

Balloon Types: Controlling Sharing of State in Data Types ...................... 32
Paulo Sérgio Almeida (Imperial College)

Static Integrity Constraint Management in Object-Oriented Database
Programming Languages via Predicate Transformers .............................. 60
Véronique Benzaken and Xavier Schaefer (Université de Paris I/XI)

Issues with Exception Handling in Object-Oriented Systems ................... 85
Robert Miller and Anand Tripathi (University of Minnesota)

Types

Subtyping is not a Good "Match" for Object-Oriented Languages ............. 104
Kim B. Bruce and Leaf Petersen (Williams College)
Adrian Fiech (Memorial University of Newfoundland)

Near Optimal Hierarchical Encoding of Types ..................................... 128
Andreas Krall (Technische Universität Wien)
Jan Vitek (Université de Genève)
R. Nigel Horspool (University of Victoria)

An Extended Theory of Primitive Objects: First Order System ............. 146
Luigi Liquori (Università di Torino)

Metaprogramming

A Reflective Architecture for Process Control Applications .................. 170
Charlotte Pii Lunau (Aalborg University)

Dynamic Object Evolution without Name Collisions ............................. 190
Mira Mezini (University of Siegen)
Invited Talk 2

Aspect-Oriented Programming ................................................................. 220
Gregor Kiczales, John Lamping, Anurag Mendhekar, Chris Maeda, Cristina Lopes, Jean-Marc Loingtier and John Irwin (Xerox PARC)

Implementation and Systems

DRASTIC: A Run-Time Architecture for Evolving, Distributed, Persistent Systems ................................................................. 243
Huw Evans and Peter Dickman (Glasgow University)

A General Framework for Inheritance Management and Method Dispatch in Object-Oriented Languages ............................................................. 276
Wade Holst and Duane Szafron (University of Alberta)

Optimizing Smalltalk by Selector Code Indexing can be Practical ............ 302
Tamiya Onodera and Hiroaki Nakamura
(IBM Tokyo Research Laboratory)

Formal Methods and Specifications

Objects, Associations and Subsystems: A Hierarchical Approach to Encapsulation ........................................................................... 324
J.C. Bicarregui, K.C. Lano, and T.S.E. Maibaum (Imperial College)

Towards a Formalization of the Unified Modeling Language ................... 344
Ruth Breu, Ursula Hinkel, Christoph Hofmann, Cornel Klein, Barbara Paech, Bernhard Rumpe and Veronika Thurner
(Technische Universität München)

Coordination Requirements Expressed in Types for Active Objects .......... 367
Franz Puntigam (Technische Universität Wien)

Java

Java is Type Safe - Probably .................................................................... 389
Sophia Drossopoulou and Susan Eisenbach (Imperial College)

Feature-Oriented Programming: A Fresh Look at Objects ...................... 419
Christian Prehofer (Technische Universität München)

Genericity in Java with Virtual Types ..................................................... 444
Kresten Krab Thorup (Aarhus University)
Patterns

Tool Support for Object-Oriented Patterns........................................................ 472
Gert Florijn, Marco Meijers and Pieter van WInsen
(Utrecht University)

A Model for Structuring User Documentation of Object-Oriented Frameworks Using Patterns and Hypertext .................................................... 496
Matthias Meusel, Krzysztof Czarnecki and Wolfgang Köpf
(Daimler-Benz AG, Research and Technology)

Using Patterns for Design and Documentation.............................................. 511
Georg Odenthal and Klaus Quibeldey-Cirkel (University of Siegen)

Invited Talk 3 (Abstract)

Going Beyond Objects with Design Patterns ................................................ 530
Erich Gamma (Object Technology International, Zurich)

Author Index..................................................................................................... 531
