Preface

This volume of the *Lecture Notes in Computer Science* series contains the papers accepted for presentation at the Third International Conference on Autonomous Infrastructure, Management and Security (AIMS 2009). The conference took place in Enschede, The Netherlands, hosted by the University of Twente. AIMS 2009 was organized and supported by the EC IST-EMANICS Network of Excellence (#26854) and co-sponsored by IFIP WG 6.6 and the Strategic Research Orientation of the University of Twente on Dependable Systems and Networks (DSN).

AIMS 2009 constituted the Third edition of a single-track and standalone conference on management and security aspects of distributed and autonomous systems, which took place initially in Oslo, Norway in June 2007, followed by AIMS 2008 in Bremen, Germany.

The theme of the AIMS 2009 conference was “Scalability of Networks and Services,” focusing on how scalable networked systems can be monitored, managed, and protected in an efficient and autonomous way. The research papers that have been selected for publication in the present proceedings have approached this theme from different perspectives, covering topics such as network resource management, overlays and peer-to-peer networks, network configuration and optimization, and monitoring and visualization.

This diversity has helped AIMS 2009 once again to reach its main objective: to be a cross-disciplinary conference where researchers can exchange their results with sufficient time for discussion of novel ideas. For the main conference program, we received a total number of 28 paper submissions. The submissions came, according to the affiliation of the first author, from 14 different countries. Seven papers came from non-European countries, the same number were submitted from non-academic organizations.

The second objective of the AIMS conference series is to provide a venue for doctoral students to present and discuss their research ideas in a wider audience. In this way, students obtain feedback about their results achieved so far, as well as about their future research plans. This idea has been implemented in the form of a PhD workshop. In total, the workshop received 15 PhD paper submissions in which PhD students gave a description of their research problem and the chosen approach, and outlined the results achieved. In addition to the main conference program and the PhD workshop, AIMS 2009 also included a tutorial program (not part of the proceedings).

All submitted conference and PhD workshop papers were reviewed by three members of the Technical Program Committee (TPC) (and additional reviewers) and the PhD Workshop Committee, respectively. Based on the reviews, and discussions with the TPC members if needed, the Program Chairs identified 12 conference papers for publication and presentation at the AIMS conference. In addition, three short papers were selected for presentation. For the PhD workshop, the Workshop Chairs selected eight papers to be included in the proceedings and to be presented at the conference.
We would like to thank the many people who helped make AIMS 2009 such a high-quality and successful event. Our thanks first go to the PhD Workshop Chairs David Hausheer and George Pavlou and to the Tutorial and Keynote Chairs Emil Lupu and Iris Hochstatter for all their efforts in constructing the technical program. In addition, we like to acknowledge the great review work performed by the members of the committees and the additional reviewers. Another special thanks goes to all authors who submitted their contributions to AIMS 2009. Finally, we would like to thank Springer, namely Alfred Hofmann and Anna Kramer, for the smooth cooperation in finalizing these proceedings. Last but not least, special thanks go to Tiago Fioreze, Silvia Meijran, Giovane Moura, and Anna Sperotto for the local organization and to the University of Twente for hosting the AIMS 2009 conference.

April 2009

Ramin Sadre
Aiko Pras
AIMS 2009 was organized by the EC IST-EMANICS Network of Excellence (#26854) and co-sponsored by IFIP WG 6.6 and the Strategic Research Orientation of the University of Twente on Dependable Systems and Networks (DSN).

**General Chair**

Aiko Pras  
University of Twente, The Netherlands

**Program Chairs**

Ramin Sadre  
University of Twente, The Netherlands
Aiko Pras  
University of Twente, The Netherlands

**PhD Workshop Chairs**

David Hausheer  
University of Zurich, Switzerland
George Pavlou  
University College London, UK

**Tutorial/Keynote Chairs**

Emil Lupu  
Imperial College London, UK
Iris Hochstätter  
Universität der Bundeswehr München, Germany

**Steering Committee**

Arosha Bandara  
The Open University, UK
Mark Burgess  
Oslo University College, Norway
Olivier Festor  
INRIA Nancy - Grand Est, France
David Hausheer  
University of Zurich, Switzerland
Aiko Pras  
University of Twente, The Netherlands
Jürgen Schönwälder  
Jacobs University Bremen, Germany
Rolf Stadler  
KTH Royal Institute of Technology, Sweden

**Technical Program Committee**

Arosha Bandara  
The Open University, UK
Marcus Brunner  
NEC Europe Ltd., Germany
Isabelle Chrisment  
ESIAL, Nancy University, France
Alva Couch  
Tufts University, USA
Gabi Dreo Rodosek  
Universität der Bundeswehr München, Germany
Olivier Festor  
INRIA Nancy - Grand Est, France
Alberto Gonzalez  KTH Royal Institute of Technology, Sweden
David Hausheer  University of Zurich, Switzerland
Heinz-Gerd Hegering  Leibniz Supercomputing Center, Germany
Georgios Karagiannis  University of Twente, The Netherlands
Alexander Keller  IBM Global Technology Services, USA
Antonio Liotta  Eindhoven University of Technology, The Netherlands
Jorge Lobo  IBM T. J. Watson Research Center, USA
Emil Lupu  Imperial College, UK
Hanan Lutfiyya  University of Western Ontario, Canada
Jean-Philippe Martin-Flatin  NetExpert, Switzerland
Hermann De Meer  University of Passau, Germany
Jirí Novotny  Masaryk University, Czech Republic
Bruno Quoitin  Université catholique de Louvain, Belgium
Danny Raz  Technion, Israel
Helmut Reiser  Leibniz Supercomputing Center, Germany
Jürgen Schönwälder  Jacobs University Bremen, Germany
Joan Serrat  Universitat Politècnica de Catalunya, Spain
Maarten van Steen  Vrije Universiteit Amsterdam, The Netherlands
Radu State  University of Luxembourg, Luxembourg
Burkhard Stiller  University of Zurich, Switzerland
Robert Szabo  Budapest University of Technology and Economics, Hungary
Filip De Turck  Ghent University, Belgium
Kurt Tutschku  University of Vienna, Austria
Marcel Waldvogel  University of Konstanz, Germany
Lisandro Zambenedetti  Universidade Federal do Rio Grande do Sul, Brazil
Granville
Tanja Zseby  Fraunhofer FOKUS, Germany

PhD Workshop Committee

Gabi Dreo Rodosek  Universität der Bundeswehr München, Germany
Olivier Festor  INRIA Nancy - Grand Est, France
Emil Lupu  Imperial College London, UK
Hanan Lutfiyya  University of Western Ontario, Canada
Joan Serrat  Universitat Politècnica de Catalunya, Spain
Rolf Stadler  KTH Royal Institute of Technology, Sweden
Burkhard Stiller  University of Zurich, Switzerland

Local Organization

Tiago Fioreze  University of Twente, The Netherlands
Silvia Meijran  University of Twente, The Netherlands
Giovane C. M. Moura  University of Twente, The Netherlands
Anna Sperotto  University of Twente, The Netherlands
Additional Reviewers

Rémi Badonnel  University of Nancy - INRIA, France
Desislava Dimitrova  University of Twente, The Netherlands
Idilio Drago  University of Twente, The Netherlands
Gábor Fehér  Budapest University of Technology and Economics, Hungary
Richard Holzer  University of Passau, Germany

Wouter Klein Wolterink  University of Twente, The Netherlands
Andras Korn  Budapest University of Technology and Economics, Hungary
Vlado Menkovski  Eindhoven University of Technology, The Netherlands
Anna Sperotto  University of Twente, The Netherlands
Mark Timmer  University of Twente, The Netherlands
Ha Manh Tran  Jacobs University Bremen, Germany
Table of Contents

Network Resource Management

Secure User-Controlled Lightpath Provisioning with User-Controlled Identity Management ............................................. 1
   Bob Hulsebosch, Robert de Groote, and Martin Snijders

A Statistical Analysis of Network Parameters for the Self-management of Lambda-Connections ........................................... 15
   Tiago Fioreze, Lisandro Granville, Ramin Sadre, and Aiko Pras

Dynamics of Resource Closure Operators ................................... 28
   Alva L. Couch and Marc Chiarini

Overlays and P2P Networks

Churn Tolerance Improvement Techniques in an Algorithm-Neutral DHT ................................................................. 42
   Kazuyuki Shudo

PeerVote: A Decentralized Voting Mechanism for P2P Collaboration Systems .............................................................. 56
   Thomas Bocek, Dalibor Peric, Fabio Hecht, David Hausheer, and Burkhard Stiller

Evaluation of Sybil Attacks Protection Schemes in KAD ................. 70
   Thibault Cholez, Isabelle Chrisment, and Olivier Festor

Network Configuration and Optimization

NETCONF Interoperability Testing ............................................. 83
   Ha Manh Tran, Iyad Tumar, and Jürgen Schönwälder

Knowledge Management and Promises ........................................ 95
   Mark Burgess

A Policy-Driven Network Management System for the Dynamic Configuration of Military Networks ..................................... 108
   Wei Koong Chai, Kin-Hon Ho, Marinos Charalambides, and George Pavlou
XII Table of Contents

A Strategy for Multi-Agent Based Wireless Sensor Network Optimization .................................................... 122
  Ahmad Sardouk, Rana Rahim-Amoud,
  Leïla Merghem-Boulahia, and Dominique Gaiți

Monitoring and Visualization

Flow Monitoring in Wireless MESH Networks ....................... 134
  Cristian Popi and Olivier Festor

Visualization of Node Interaction Dynamics in Network Traces .... 147
  Petar Dobrev, Sorin Stancu-Mara, and Jürgen Schönwälder

Short Papers

Towards Energy Efficient Change Management in a Cloud Computing Environment .................................................... 161
  Hady AbdelSalam, Kurt Maly, Ravi Mukkamala,
  Mohammad Zubair, and David Kaminsky

A Market-Based Pricing Scheme for Grid Networks ................. 167
  Peng Gao, Xingyao Wu, Tao Liu, and David Hausheer

Consistency of Network Traffic Repositories: An Overview ........ 173
  Elmer Lastdrager and Aiko Pras

PhD Workshop

A P2P-Based Approach to Cross-Domain Network and Service Management .................................................... 179
  Adriano Fiorese, Paulo Simões, and Fernando Boavida

PeerCollaboration ................................................ 183
  Thomas Bocek and Burkhard Stiller

Fast Learning Neural Network Intrusion Detection System ........ 187
  Robert Koch and Gabi Dreo

Design of an Autonomous Framework for Efficient Large Scale Management of Next Generation Web Service Mashups 191
  Anna Hristoskova and Filip De Turck

Scalable Detection and Isolation of Phishing ....................... 195
  Giovane C.M. Moura and Aiko Pras

Multi-agent Reinforcement Learning in Network Management ...... 199
  Ricardo Bagnasco and Joan Serrat
Answering Queries Using Cooperative Semantic Caching ............... 203
    Andrei Vancea and Burkhard Stiller

Towards Cost-Aware Multipath Routing .................................. 207
    João Taveira Araújo, Miguel Rio, and George Pavlou

Author Index ................................................................. 211
